

Justin Kang

(213)-587-0970 | justin-kang@berkeley.edu | www.linkedin.com/in/justin-kang06

Education

University of California, Berkeley

Expected Graduation May 2028 / Berkeley, CA

Pursuing a Bachelor of Science in Data Science, Industrial Engineering and Operations Research Minor

Relevant Courses: Foundations of Data Science, Data & Decisions, Decision Analytics, Concepts of Probability, Computational Structures in Data Science, Data Journalism - Analysis & Visualization.

Technical Skills

Languages/Tools: Python, SQL/MySQL, Pandas, NumPy, Matplotlib, Jupyter, Git, JavaScript.

Analytical Methods: A/B Testing, Statistical Modeling, Trade-off & Sensitivity Analysis, Regression Analysis.

Professional Experience

Berkeley AI Research, Robotic AI & Learning Lab – Research Assistant *Oct 2024 – May 2026 / Berkeley, CA*

- Designed and ran structured measurement studies across 15+ experimental configurations, applying statistical analysis to isolate performance factors and identify failure modes.
- Applied A/B testing to compare ML policy variants and quantify performance trade-offs; synthesized findings into actionable recommendations for engineering stakeholders.
- Processed and validated large-scale operational datasets in Python (Pandas), ensuring data integrity for decision-making.

MustemUSA (eBay Store) – Founder

Aug 2020 – Apr 2024 / Los Angeles, CA

- Managed pricing, inventory, and fulfillment operations for an e-commerce resale business generating \$100K+ in revenue, scaling to international markets while sustaining 100% positive customer feedback and eBay Top-Rated Seller status

Projects

UrbanPilot — AI Urban Planning Tool | June 2026

- Architected a multi-agent AI system that runs parallel scenario analyses across climate, housing, accessibility, and urban design dimensions for any real address
- Integrated and cleaned data from 6 real-world sources (Census ACS, FEMA, Open-Meteo, Transit 511, Google Maps) to surface trends and support multi-variable scenario and sensitivity analyses across planning dimensions

Barelyatwork (Flux) — Voice-Activated AI Automation | April 2026

- Developed a voice-first automation platform on Meta Ray-Ban glasses triggering multi-step workflows across 12+ services (Gmail, Slack, Notion, Fetch.ai Agentverse)
- Engineered a constrained Gemini LLM pipeline with validate→repair loop converting voice transcripts to structured workflow JSON, eliminating invalid parameters

Skyline Transport — Overhead Material Handling System | April 2025 | Berkeley, CA

- Co-designed a modular overhead gantry and cart system for semiconductor cleanroom material handling, meeting ISO 14644 standards; awarded 2nd place at ASME UC Berkeley CADathon Spring 2025
- Conducted trade-off analysis across layout alternatives and selected materials within a \$2,300 BOM to meet cleanroom and conveyance requirements

Leadership & Involvements

Hispanic Scholarship Fund — YLS Scholar Squad Leader

May 2024 — May 2026 / Hybrid

- Provided one-on-one mentorship to 15+ high school seniors through two different college application cycles, helping structure decision frameworks for competitive applications. Facilitated operations at the 2024 USC & 2025 Princeton Young Leaders Summit. Mentees accepted to Yale, Columbia, Tufts (Questbridge), USC, WashU, and UC Berkeley.
